

Anu Murali

Python Developer | Data Analyst | Machine Learning Engineer

+91 92074 17013 | anu10work@gmail.com | linkedin.com/in/anu-murali | Mavelikara, Kerala, India

PROFESSIONAL SUMMARY

Motivated Python Developer and Data Analyst with hands-on experience building machine learning pipelines, automating ETL workflows, and developing interactive Power BI dashboards. Proficient in Python (Pandas, NumPy, Scikit-learn, TensorFlow, Keras), SQL, Power BI, and DAX. Experienced in delivering end-to-end data solutions — from raw data ingestion and cleaning through to predictive modeling and stakeholder-ready reporting. Strong communicator who translates complex analytical findings into clear business recommendations.

TECHNICAL SKILLS

Python	Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, Keras, Jupyter Notebook
Development	OOP, Script Automation, Data Pipelines, REST APIs, Git, Version Control
ML / AI	Regression, Classification, Clustering, Deep Learning, Feature Engineering, Hyperparameter Tuning, A/B Testing
BI & Data	Power BI, DAX, SQL, Excel (Advanced, Pivot Tables, Power Query, VLOOKUP), ETL, EDA, Data Governance
Soft Skills	Problem Solving, Data Storytelling, Stakeholder Communication, Agile Teamwork, Attention to Detail

PROFESSIONAL EXPERIENCE

Python Developer & Data Science Intern

January 2025 – June 2025

Luminar Technolab, Kakkanad, Kerala, India

- Built end-to-end Python machine learning pipelines using Pandas, NumPy, and Scikit-learn — covering data ingestion, preprocessing, model training (regression, classification, clustering), and evaluation — improving prediction accuracy by 15% through feature engineering and hyperparameter tuning.
- Automated ETL workflows in Python to process and clean datasets of 50,000+ records, improving data quality by 30% and reducing manual processing errors through reusable, validated scripts.
- Developed and deployed deep learning models using TensorFlow and Keras for predictive analytics; conducted A/B testing to benchmark model performance across multiple business scenarios.
- Designed and published 3+ interactive Power BI dashboards with DAX measures to visualize KPIs, enabling stakeholders to make data-driven decisions 40% faster.
- Documented Python data pipelines and applied data governance best practices, ensuring code reproducibility, maintainability, and compliance with quality standards.
- Collaborated in an agile team environment, translating complex analytical outputs into clear business recommendations for senior stakeholders.

Computer Networking Intern

May 2024 – July 2024

Keltron, Ernakulam, Kerala, India

- Configured and tested LAN/WAN infrastructure — including routers, switches, and firewalls — in a live enterprise environment serving 200+ users.
- Monitored real-time network performance using industry-standard tools, contributing to a 20% reduction in network downtime.
- Documented network topology and protocols to strengthen the team knowledge base, improving operational efficiency and onboarding for new members.

PROJECTS

Customer Churn Prediction Model — Python, Scikit-learn, Pandas, Matplotlib

- Built a classification model to predict customer churn with 87% accuracy using logistic regression and random forest algorithms trained on 10,000+ customer records.

- Performed exploratory data analysis (EDA), feature engineering, and model evaluation using confusion matrix, ROC-AUC score, and cross-validation for robust performance assessment.

Election 2025 — Voting Trend Analysis — *Python, Excel, Power BI, DAX*

- Wrote Python scripts to clean and analyze 1,000+ election data points; built Power BI dashboards with drill-through filters and DAX-calculated KPIs to surface regional trends.
- Identified 5+ statistically significant voting patterns and presented findings through data storytelling to a non-technical audience.

Regional Economic Development Dashboard — Is India Developing Equally? — *Python, Power BI, DAX*

- Integrated multi-source datasets using Python, applied DAX measures to compute development indices across 20+ states, and built an interactive Power BI dashboard tracking 20+ KPIs.
- Revealed significant urban-rural development gaps through visual data storytelling, enabling data-informed policy discussions with stakeholders.

EDUCATION

Bachelor of Computer Applications (BCA) — Distance Education 2024 – Present

IGNOU | Study Centre: SH Thevara College, Ernakulam, Kerala

Diploma in Computer Engineering 2021 – 2024

Govt. Polytechnic College, Cherthala | State Board of Technical Education, Kerala

HSE — Commerce with Computer Application 2019 – 2021

Govt. Vocational Higher Secondary School, Chunakkara | Board of Higher Secondary Education, Kerala

CERTIFICATIONS

- Data Science and Machine Learning — Luminar Technolab (2025)
- Power BI for Data Analysts — Microsoft Learn (2024)
- Python for Data Analysis — Coursera / NPTEL (2024)
